

Dear Hiring Manager,

Subject: Application for AI Engineer (Mobile/Backend) – Remote

I am looking for a full-time or part-time position as an AI Engineer (Mobile/Backend).

I have 6 years of experience building mobile and backend applications. I am an expert in AI-assisted software development using Claude Code CLI, building frontend applications with Flutter, React Native Expo, iOS (Swift), and Android (Kotlin/Java), and backend services with Python FastAPI, Node.js, and PHP REST APIs. I have experience with AI-assisted software engineering using Claude Code, Codex, AI agents, specs, plans, epics, hooks, multi-agent delivery workflows, custom commands (SuperPower or custom commands), agent context & memory, Claude.md, MCP/Plugin integration, vibe coding, and automated development pipelines to deliver production-ready applications faster.

I am looking to transition and grow further into AI Engineering. I want to work with Python and gain practical, hands-on experience with Generative AI, LLMs, Agentic AI, Agentic RAG pipelines, LangChain, LangGraph, LlamaIndex, LangFlow, DSPy, AutoGen, CrewAI, MCP, AI Agent SDKs, OpenAI and Anthropic APIs, Hugging Face, Transformers, Ollama, vLLM, multimodal AI, fine-tuning, prompt engineering, AI evaluation and observability, vector databases such as Pinecone, FAISS, Weaviate, Qdrant, and MongoDB Atlas Vector Search, cloud deployment on AWS/GCP, LLMOps, MLOps, and other emerging AI tools and technologies as the field continues to evolve.

I am eager to learn while working on real-world AI projects and would really value an opportunity to join a team where I can contribute my existing software development experience while continuing to grow and develop my skills in AI Engineering.

I am also open to **flexible compensation** for the right opportunity that provides meaningful learning, mentorship, and hands-on experience.

I would greatly appreciate the opportunity to discuss how my skills and experience align with your company's goals.

Kindly find my CV attached for your review.

Sincerely,

Munir Abbas

MUNIR ABBAS

AI Engineer (Mobile / Backend) – Remote

+923009231382 | P-125, Block N, North Nazimabad, Karachi, Pakistan

CORE TECHNICAL SKILLS

Flutter Dart	React Native Expo	iOS Swift (Native)
Android Kotlin/Java	Claude Code CLI / Codex CLI	Firebase / REST APIs
App Store & Play Store	CLEAN+ MVVM Architecture	PHP, MySQL, WebSocket

PROFESSIONAL EXPERIENCE

Senior AI Software Engineer (Mobile) - Remote

Asian Information Technology Ltd. (AITL) | Feb 2021 – May 2026 (5 yrs 4 mos) | Remote

I have developed high-performance cross-platform mobile applications using **Claude Code, Flutter, React Native Expo, iOS (Swift), Android (Kotlin)**, and occasional backend development using **Node.js, Python FastAPI with PostgreSQL**. Managed the complete software development lifecycle, including architecture, planning, implementation, AI-assisted development, testing, deployment, and production support.

Key Responsibilities

- Designed and developed scalable frontend applications using **Claude Code CLI** with **Flutter, React Native Expo, iOS (Swift), and Android (Kotlin)**.
- Developed backend services using **Python FastAPI, Node.js, PostgreSQL**, and **REST APIs**.
- Designed and implemented end-to-end application architecture, including frontend, backend, API integration, and database design.
- Integrated Firebase services including **Realtime Database, Remote Config, Crashlytics, Analytics, Authentication, and Push Notifications**.
- Published, maintained, and managed applications on the **Apple App Store** and **Google Play Store**.
- Collaborated with remote teams to define product requirements, improve UI/UX, and optimize application performance.
- Maintained high code quality using **Clean Architecture, SOLID principles**, and modern software engineering practices.
- Implemented platform-specific functionality for iOS and Android using **Swift** and **Kotlin** when required.
- Leveraged **Claude Code CLI** for AI-assisted software engineering, including architecture planning, feature implementation, API integration, debugging, testing, code optimization, refactoring, documentation, and production support.
- Used **Claude Code workflows** including **Specs, Plans, Epics, Hooks, Custom Commands, Claude.md, Context & Memory, Multi-Agent development**, and **MCP integrations** to accelerate software delivery while maintaining production-quality code.

Head of Mobile App Development

Rydus Technologies Pvt. Ltd. | Oct 2013 – Jan 2021 (7 yrs 4 mos) | *Karachi, Pakistan – On-site*

Led the design, development, deployment, and maintenance of multiple full-stack mobile and web solutions across ride-sharing, food delivery, and real-time tracking domains at the Karachi office of Rydus Technologies.

Roles & Responsibilities:

- Led project and team management for cross-functional mobile and backend development teams
- Worked hands-on as a Full Stack Mobile Developer (Android & iOS) using native technologies
- Managed REST API and real-time service development using PHP, MySQL, and WebSockets
- Handled Linux web hosting (WHM, cPanel, SSH) and deployment environments
- Managed Apple Developer Program, iTunes/App Store submissions and Google Play Store releases
- Integrated third-party SDKs/APIs: Google Maps APIs, Skobbler Navigation SDK, Card.IO, Stripe, and PayPal

Key Mobile Apps Developed:

- Rydus (iOS & Android) – A ride-sharing application for passengers, similar to Uber
- RydusDriver (iOS & Android) – Driver app integrated with Skobbler Navigation SDK
- RydusDriver Lite (Android) – Lightweight version using Google Maps for routing
- MealRuners (iOS & Android) – Online food delivery app integrated with Yelp API and RydusDriver
- MRAdmin (Android Tablet) – Real-time order tracking app for restaurant managers

Web Applications:

- Developed customer panels, admin panels, driver dashboards, and restaurant admin dashboards (rydus.com | mealruners.com)

Note: These apps are no longer available on App Store/Play Store due to business closure; demo videos are available as proof of development.

Senior Software Engineer (iOS / Android)

Grappetite | Feb 2012 – Oct 2012 (9 mos) | *Tariq Road, Karachi, Pakistan*

Android and iOS app development across multiple projects:

- Blitsen Speed (Basic & Pro) – User login via server-side JSON APIs; measured and displayed upload/download data transfer speeds
- Voyageur (WayTag.com) – Login/account creation via JSON APIs; image and location data upload
- On the Farm – Kids Book (Android & iOS) – Educational app for children; published on Google Play and App Store
- Bosch App – Product categories and dealer locations displayed on an interactive map with SQLite integration
- SwissLife – Login via JSON APIs, shareholder company map display, barcode scanning with ZXing library
- ProLife (2D Android Game – Incomplete) – Concept game with point tracking, gift rewards, and level management

EDUCATION

Master's Degree – Pervasive Computing (MSc)

Birmingham City University, UK | 2007 – 2009 | Grade: 180 Credits

Modules: System Design, Project Management, Mobile Development, Ubiquitous Technologies, Ethics & Professional Issues, Business Development. Research: Home Automation Integrated Wrapper.

Bachelor's Degree – Commerce

University of Karachi | 1995 – 1996 | Grade: C

Subjects: Business Communication, Auditing, Accounting, Management.

One-Year Computer Science Diploma

Petroman Computer Institute, Karachi | 1996 | Grade: 79%

Subjects: GW-Basic, C, C++, COBOL, Data Structures, MS Office, Principles of IT.

Higher Secondary Certificate – Inter Commerce

Karachi Higher Secondary Board | 1993 – 1994 | Grade: C

Secondary School Certificate – Science

Jamia Millia Pilot Secondary School | 1989 – 1990 | Grade: B
